Urban Living Labs to be developed, based on principles of the Circular Economy.

CRUNCH Aims

CRUNCH has an integrated approach to facilitate decision-making for cities

The aims of CRUNCH are:

1. To demonstrate how the Food-Water-Energy Nexus can strengthen urban resilience and resource efficiency of the participating cities.

2. To create an interconnected knowledge platform with cross-sectorial indicators for a support tool and assessment Framework (the Integrated Decision Support System - IDSS).

3. To improve and support robust decision-making on future urban development through the guiding tool.

CRUNCH Process
